Hayley D. Yaglom, MS, MPH
Senior Vector-borne & Zoonotic Disease Epidemiologist | RMSF Epidemiologist
Office of Infectious Disease Services | Bureau of Epidemiology & Disease Control
Arizona Department of Health Services
150 North 18th Avenue, Suite 140, Phoenix, Arizona 85007
Phone (Office): 602-364-3676; Email: Hayley.Yaglom@azdhs.gov

Hayley Yaglom has worked with the Arizona Department of Health Services since the summer of 2014 as a vector-borne and zoonotic disease epidemiologist. In this role, she conducts surveillance, preparedness, prevention, and outreach activities with state, local, and tribal partners across Arizona. Hayley works largely with tribal communities to combat the continued public health threat of Rocky Mountain spotted fever. Hayley graduated with a MPH in Veterinary Public Health and Epidemiology from the University of Missouri. She also received a Masters of Science from the University of Massachusetts, and has a strong background in the veterinary sciences. Hayley's passion is examining ways to use animals as a surveillance tool to predict risk for human disease through a One Health paradigm.
