

County Event Request Form

La Paz 4-H Council has the authority to approve project-related educational activities as county events. The following form needs to be submitted and approved by 4-H Council in order for the event to gain county event status. The 4-H agent has set the following parameters regarding county events.

1. The educational event must allow for other clubs and project groups to attend the event. Advertising the event in the 4-H newsletter is recommended.
2. The event must have a clear educational objective related to a 4-H project. Common examples include FFA animal science clinics, and field trips to learn more about a project in the "real world" (Breeding Farms, Plays, Art Exhibits, etc...).
3. Animal Events need to have an educational aspect other than just competition. An animal science educational event should include clinics, quizzes, or other educational opportunities to allow the youth to learn more about the animal.
