

## **STAT574S**

### **Project Instructions**

1. Course project is required for every student in this class.
2. Each group consists of 2~3 students
3. The project involves analysis of survey data, preparation of a technical report and a presentation. Both report and presentation will be evaluated.
4. The report will be due the last day of class and presentation will be scheduled the last week of class.

Each group needs to email the instructor what dataset you want to work on and names of group members by **April 10**.

### **Report:**

Report format: single-spaced and no more than 4 pages (figures, tables, and references included) + appendix

### **Presentation:**

Presentation will be scheduled the last week of class. Each group will have 25 minutes for presentation and 5 minutes for questions and discussions. Carefully arrange your presentation flow and especially practice in advance. All students in a group need to participate in presentation. PowerPoint slides need be emailed to the instructor after presentation.
