## The Future of Higher Education

Roger L Caldwell

March 26, 2012

SHEHRE Meeting, Tucson, AZ

# FUNCTIONS OF HIGHER ER

Ways of Anticipating the Future
Driving Forces of Change

Possible Futures for Higher Education

#### **OVERVIEW – THE BIG PICTURE**

## Why Study the Future?

- To make better decisions today
- Because you will spend the rest of your life there
- Growing awareness that significant changes will happen

## How to Anticipate the Future

- Know something about the past (~ 30 + years)
- Understand key driving forces of change and their implications
- Develop relevant scenarios for understanding possible planned or unplanned futures
- Make realistic assumptions but don't be too cautious and end up moving too slowly

#### It is Hard to Break Old Habits

 Don't drive on a new mountain road by looking in the review mirror

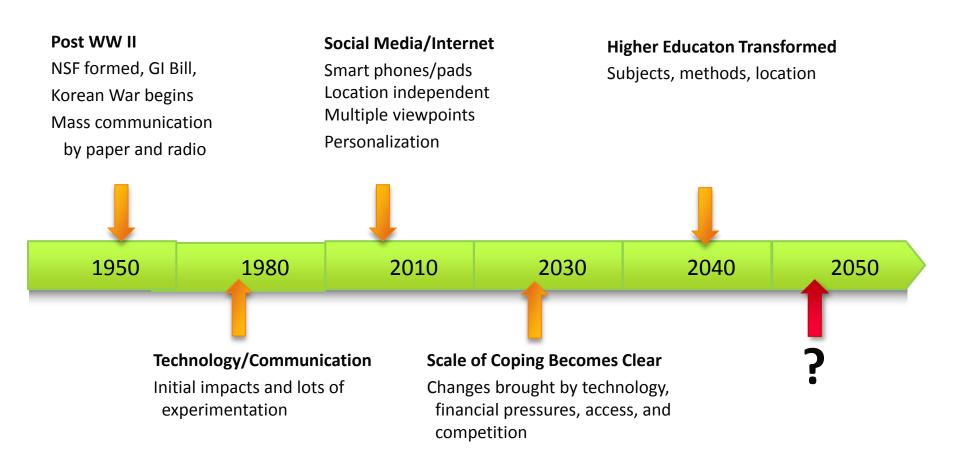

or, in other words

 Don't manage a university in the 21<sup>st</sup> century by continuing past experiences and expectations

## A New Vocabulary

- Smart (everything)
- New Normal
- New Rules
- Strategic Foresight/Strategic Thinking
- Sustainable (broadly defined)
- Disruptive Innovation
- Amplified individuals/organizations
- Ted Lectures and Kahn Academy

# Recent History and Possible Futures 30-Year Increments

## 7 Driving Forces of Change

- 1. Economic and Financial
- 2. Physical and Social Infrastructure
- 3. Population and Demographics
- 4. Resources and Environment
- 5. Science and Technology
- 6. Learning and Communication
- 7. Global Shifts *size, players, politics, economy*

# Discussion #1 What if...

 Any person in the world could contact any other person, anywhere, anytime, and cheaply

#### and

 Any person can find and read essentially any information on any topic, anytime, cheaply

#### then

How does higher education change? (How would you have answered this in 1980?)

### Words of Wisdom

- A man who wants to lead the orchestra must turn his back on the crowd. -- <u>Max Lucado</u>
- Study the past, if you would divine the future. -- <u>Confucius</u>
- The future influences the present just as much as the past.
  - -- Friedrich Nietzsche
- Change is the law of life. And those who look only to the past or present are certain to miss the future. -- <u>John F. Kennedy</u>
- You can lead a man to Congress, but you can't make him think. -- <u>Milton Berle</u>

#### Words of a Lack of Wisdom

- "There is no reason for any individual to have a computer in his home"
  - Ken Olsen, 1977, President of Digital Equipment
     Corporation, Speaking to the World Future Society
  - Widely quoted but actually referred to homes controlled by a computer, not a "personal computer"
- "Rising Sea Levels Could Threaten 3.7 M by 2100"
  - AP Wire Services, March 2012, widely quoted

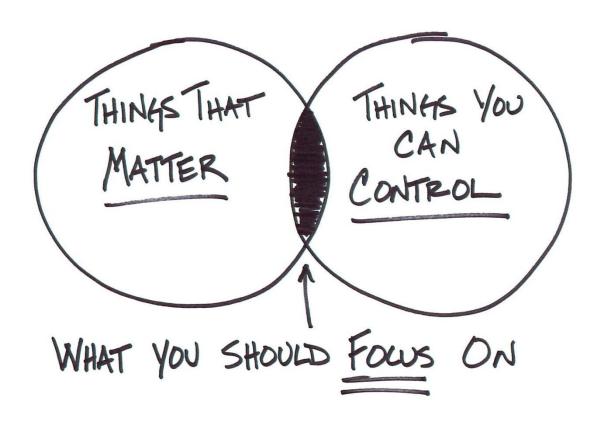

# Discussion #2 What If ...

- Investment returns are less in the next 20 years than in the last 20 years? (for both institutions and individuals)
- Massive multi-player on-line role-playing games become significant for student learning and stock market automated trading

## **Cautions**

- Watch for group think or over reliance on traditions
- Don't confuse ordinary change with transformational change
- It takes a village to make lasting change
- Simple is good don't over analyze, over extrapolate, over complicate, or over worry.

#### Think Strategically

BEHAVIORGAP. COM

# How the Mighty Fall Jim Collins 2009

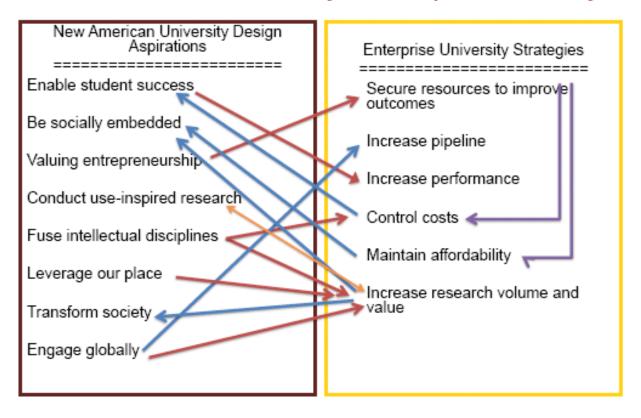

- Five Stages of Decline
  - 1. Hubris Born of Success
  - 2. Undisciplined Pursuit of More
  - 3. Denial of Risk and Peril
  - 4. Grasping for Salvation
  - 5. Capitulation to Irrelevance or Death
- Well Founded Hope (if caught by stage 4)
  - Recovery and Renewal

#### Case Histories for Change or Planning

- Arizona State University New President in 2002
  - New American University significant change (real strategic plan)
  - 8 Design principles consistent over time and transforming
- MIT Open Course Ware (OCW) Project began 2000
  - Over 2000 free courses serving MIT students (and others)
  - Reference standard for other universities and students worldwide
- University of Michigan The Millennium Project in 1999, with James Duderstadt, a roadmap to 2017 – the bicentennial)
  - Includes special studies, e.g., the future of the research university

# Choose Appropriate Formats: ASU Aspiration vs Reporting Metrics

#### The New American University as Enterprise University

6

# Discussion #3 What if...

A time comes when several significant changes occur at the same time. For example,

- 1. Federal funds for research and students decrease
- Learning options permit students to self study much more effectively for many courses
- 3. Improved analytics, robotics, and communication reduce administrative personnel by 50%
- 4. Demographic changes age, experience, values
- Universities and states cooperate to solve a variety of statelevel problems
- 6. The rapid movement to cloud information storage underestimates the safety of the cloud

# Degree of Change

#### **Four Scenarios**

#### Example Results of Different Approaches to the Future

#### **Continuous Change**

Participatory decision making Expand traditional funding Followers rather than leaders Mix of good and bad results

#### **Transformation**

Faculty roles change Student engagenent high Multiple approaches used New funding sources

#### **Living in Past Glory**

Fragmented decision making Strong on tradition Incremental change Values represent 1950s

#### **Rearranging the Chairs**

Change is an elusion
High admin turnover
e-learning as add-on
High faculty/staff turnover

#### Difficulty of Making Change

# Characteristics of the Future of Higher Education

- Learning is transformed; students become more like independent agents
- Discovery and engagement involve more nonuniversity partners
- Smart management and flatter organization
- Universities continue a crediting role but credit banks exist to transfer credits
- Funding patterns shift to many new types

# So, What is the Future of Higher Education?

- Many futures are possible
  - Major vs minor change in structure and activities
  - Ability to incorporate the currently unknown
  - Wisdom to retain the most relevant of the old
- Leadership is important in many areas
  - Change management
  - Understand the past and anticipate the future

# The Need for a New Mindset: <u>Understanding Transitions Between Eras</u>

- The Problem is that we live in a VUCA world:
  - Volatile, Uncertain, Complex, and Ambiguous
- The historic solutions include:
  - Appoint a committee, watch others, try modifications of past successful efforts, reorganize, 3 envelopes
- A better solution is to be FAIR
  - Flexible, Agile, Innovative, and Responsive

- The university or college of the future will take many forms, and may be quite unlike today
- To predict what it will actually look like is not a productive activity - unless it is for a better understanding of what is possible

See handout for greater details, references and higher education scenarios about possible futures

#### **QUESTIONS**
