

**Pesticide Information Request Response**  
**Arid Southwest IPM Network**  
**Arizona Pest Management Center**  
**September 14, 2009**

**Data Request:** Dimethoate IRED

**Date Sent:** August 4, 2009

**Comments Due:** September 12, 2009

**Process / Data Sources:** Al Fournier of the Arizona Pest Management Center (APMC) coordinated input on a dimethoate information request in January 2006. In response to this follow up request, Fournier solicited additional input from Arizona IPM Specialists and forwarded the request to Arid Southwest IPM Network partners at New Mexico State University, University of California Cooperative Extension and University of Nevada Reno. No additional information on dimethoate use patterns or stakeholder concerns beyond what was gathered in January was received. Therefore, no formal response to this issue was provided by the Arizona Pest Management Center on this date. Please see the response dated 1/9/06 on our website for the previous stakeholder response for this active ingredient.
