

Arizona Delivers

Want to know more about how Arizona Cooperative Extension makes a difference for people and communities in Arizona? Try Arizona Delivers, a convenient Web site featuring single-page descriptions of educational outreach programs and their local impact. The site, searchable by topic or county, includes reports on programs in 43 topic areas that are updated annually. You can find out about results in 4-H youth, agricultural literacy, livestock, crops, consumer issues, financial planning, nutrition, rangelands, water issues, wildlife, integrated pest management and many other programs. Each article is accompanied by a photo and the name of a UA faculty contact for more information.

Cooperative Extension connects Arizona communities with research, information and expertise developed at The University of Arizona, the state's land-grant institution. With offices in all 15 counties and on Indian reservations, Cooperative Extension agents bring knowledge to people every day to enhance their work and enrich their lives.

The screenshot shows the Arizona Delivers website interface. The header includes the University of Arizona logo and navigation links. The main content area displays an article titled "Aquatic Weed Control" with a sub-heading "IPM Strategies Successful for Nuisance Plants". The article text discusses aquatic weeds as a nuisance in many Arizona communities and mentions that aggressive non-natives threaten golf courses and community lakes. It also notes that UA researchers, in collaboration with public agencies, non-governmental organizations and land-use planners, developed a public awareness campaign which has led to the decrease of aquatic weeds in irrigation canals and other public waterways. A photo shows a person in a boat using a pump to remove weeds from a canal. The article includes sections for "What has been done" and "Impact".

The screenshot shows the Arizona Delivers website interface. The header includes the University of Arizona logo and navigation links. The main content area displays an article titled "Community-Wide Awareness of Fire Dangers" with a sub-heading "Forestry Education in Navajo County". The article text discusses the small town of Show Low, Arizona, which was threatened by fire in the early summer of 2002. It mentions that hundreds of thousands of acres were threatened by fire and that the forested areas of southern Navajo County are primarily dense and low diversity in both age and size classes. A photo shows a person in a field. The article includes sections for "What has been done" and "Impact".
